

# Ziyi Liu

HCI RESEARCHER | XR/AI AGENT DEVELOPER

✉ liuziyi1230@gmail.com | 🏠 www.ZiyiLiuCN.com

## Education

---

### Purdue University

PH.D. STUDENT

- Lead researcher in developing **Intelligent Authoring/Tutoring, Tangible User Interface, Visual Programming AR/VR/XR systems**. Advisor: Dr. Karthik Ramani.
- Published **4** lead-author research papers in CHI and UIST. Co-authored **9** papers in top-tier HCI venues. Got **2** Patent Applications.

*West Lafayette, IN*

*Aug. 2021 - Present*

### Purdue University

MASTER'S DEGREE OF MECHANICAL ENGINEERING

### Purdue University

BACHELOR'S DEGREE OF MECHANICAL ENGINEERING

*West Lafayette, IN*

*Jan. 2019 - Aug. 2021*

*West Lafayette, IN*

*Aug. 2014 - May. 2018*

## Research Experience

---

### GesPrompt: Leveraging Co-Speech Gestures to Augment LLM Understanding in Mixed Reality

CO-AUTHOR

- Introduced GesPrompt, a copilot system that integrates speech with co-speech gestures for seamless interaction in XR environments.
- Utilized LLM capabilities to process multimodal inputs, enabling users to manipulate virtual objects with gestures and natural voice commands seamlessly.
- Designed a prototype implementing the workflow, showcasing applications in virtual content creation and real-time interaction.
- Conducted a user study to evaluate the system, showing enhanced usability and communication efficiency in spatial tasks.

*West Lafayette, IN*

*Under CHI 2025 Review*

### avaTTAR: Table Tennis Stroke Training with On-body and Detached Visualization in Augmented Reality [C.1]

CO-AUTHOR

- Introduced an AR system for table tennis stroke training using both on-body and detached visual cues to enhance motor skill learning.
- Developed a motion capture system that uses pose estimation and IMU sensors for real-time feedback and comparison with expert avatars.
- Conducted user studies demonstrating the system's effectiveness in improving stroke accuracy and high user satisfaction.

*West Lafayette, IN*

*Published in UIST 2024*

### ClassMeta: Designing Interactive Virtual Classmate to Promote VR Classroom Participation [C.2] [Honorable Mention Award (Top 5%)]

CO-LEAD AUTHOR

- Introduced a novel approach to promote classroom participation by designing LLM-based virtual agents to exert peer influence.
- Designed interactions for the virtual agents that include proactive engagement with both students and the instructor.
- Conducted a between-group comparative user study that evaluates the effectiveness of the interactions.
- Compiled a template for tuning the agent's behavior through GPT, facilitating future educators to implement their customized agents.

*West Lafayette, IN*

*Published in CHI 2024*

### InstruMentAR: Auto-Generation of Augmented Reality Tutorials for Operating Digital Instruments Through Recording Embodied Demonstration [C.3]

CO-LEAD AUTHOR

- Developed a system that automatically generates digital instrument AR tutorials by recording users' operations.
- Prototyped a hand wearable with pressure sensors to detect the precise frames of each operation.
- Built a decision-tree algorithm that differentiates operations based on the pressure and gestural data.
- Conducted multiple comparative studies to evaluate respective features of the system.

*West Lafayette, IN*

*Published in CHI 2023*

## **LearnIoTVR: An End-to-End Virtual Reality Environment Providing Authentic Learning Experiences for Internet of Things [C.4] [Honorable Mention Award (Top 5%)]**

[West Lafayette, IN](#)

CO-LEAD AUTHOR

*Published in CHI 2023*

- Built a VR environment that enables students to install, program, and test IoT applications.
- Designed the 3D block-based programming system based on the affordance of VR.
- Implemented the virtual IoT programming mechanism through the event system in Unity3D.
- Evaluated the effectiveness of the system by conducting quantitative and qualitative usability studies.

## **MechARspace: An Authoring System Enabling Bidirectional Binding of Augmented Reality with Toys in Real-time [C.5, P.1]**

[West Lafayette, IN](#)

CO-LEAD AUTHOR

*Published in UIST 2022*

- Summarized an input-output model of the bidirectional physical-virtual interaction for AR-empowered toys.
- Prototyped a collection of IoT modules and their communication protocol with the AR headset.
- Created an immersive authoring interface to link the behaviors of AR content and objects.
- Conducted multiple comparative studies to evaluate respective features of the system.

## **ColabAR: A Toolkit for Remote Collaboration in Tangible Augmented Reality Laboratories [C.6]**

[West Lafayette, IN](#)

CO-AUTHOR

*Published in CSCW 2022*

- Designed an AR-compatible toolkit to improve social presence through vibration feedback.
- Prototype the hardware of the toolkit with PTC Creo and SLA printer.
- Came up with a list of haptic behaviors, and programmed the behaviors within Unity3D and Arduino.
- Established the connection between the toolkit and the phone by utilizing BLE.

## **RobotAR: An Augmented Reality Compatible Teleconsulting Robotics Toolkit for Augmented Makerspace Experiences [C.7]**

[West Lafayette, IN](#)

CO-AUTHOR

*Published in CHI 2021*

- Designed and built a desktop-based robot that can be remotely controlled for navigation.
- Implement ARCore into the system that enabled the robot to autonomously navigate the makerspace.
- Created the interface of the system that allows the remote user to control the movement of the robot and annotate in the local makerspace

## **Meta-AR-App: An Authoring Platform for Collaborative Augmented Reality in STEM Classrooms [C.8]**

[West Lafayette, IN](#)

CO-AUTHOR

*Published in CHI 2020*

- Built a system for easy-creation of AR learning material for Assembly tasks.
- Designed a collaborative workflow for AR tutorial iteration.
- Implemented the interface of the system that allows the users to import, manipulate, and assemble their own 3D models to create AR tutorials

## **Blindness Visualizer: A Simulated Navigation Experience [C.11]**

[West Lafayette, IN](#)

CO-AUTHOR

*Published in IEEE VRW 2020*

- Created a VR game that simulates the whole story of a blind drummer attending a concert with his cane.
- Simulated the cane by the Oculus joystick and regenerated the physical feedback with haptic feedback.
- Rephrased the drummer's memory about the surrounding environment with customized VFX.

## **Technical Skills**

---

<b>AR/VR/XR Development</b>	Unity3D; HoloLens 2, Oculus Quest; ARCore, ARKit, Vuforia
<b>Programming Languages</b>	C#, C++, Python, R
<b>Design and Prototyping</b>	PTC Creo, Arduino, Blender, Matlab, AutoCAD, 3D Printing, Laser Cutting, CNC Machining
<b>Deep Learning</b>	PyTorch
<b>Large Language Model</b>	LLM-Embedded Application Development in Unity, Prompt Engineering with GPT-4

## Design and Prototyping Projects

---

### Cargo Distributing Robot

*West Lafayette, IN*

ME MECHATRONICS PROJECT

*Jan. 2022 - May. 2022*

- Developed a robot that can distribute cargo(cubic foam) to designated colored regions .
- Designed the FSM, and the structure of the robot.
- Designed, manufactured, and assembled the distributing mechanism of the robot.
- Programmed the FSM of the robot by Arduino.

## Teaching Experience

---

### Toy Design (Computer-Aided Design and Prototyping)

*West Lafayette, IN*

TEACHING ASSISTANT

*Spring 2019 - Spring 2024*

- Delivered lectures about CAD using PTC Creo to over 200 students.
- Tutored struggling students individually and in small groups to reinforce learning concepts.
- Designed mid-term competition projects aiming to reinforce students' innovative thinking and the capability of CAD prototyping.
- Organized events for the students to present their projects to the public.

## Honors and Awards

---

May. 2024 **Honorable Mention**, ACM Conference on Human Factors in Computing Systems [CHI 2024]

*Honolulu, Hawaii*

Apr. 2023 **Honorable Mention**, ACM Conference on Human Factors in Computing Systems [CHI 2023]

*Hamburg, Germany*
